

# CORPORATE PROFILE

Vita Mobility Werks (VMW), with its *Forza* Public Safety division, provides mobility solutions designed to meet an increasingly important challenge across society today: the speed of safety. We offer a fleet of high quality, commercial grade electric vehicles that help individuals mobilize quickly, move swiftly, and command a strong physical presence to serve and protect.

At VMW, we believe our society is in the midst of a transportation revolution. The public safety landscape is changing by the minute, the urban environment is expanding and resource restrictions are a reality. VMW's *Forza* Series was formed to address these very issues. By providing a comprehensive line of electric vehicles, we are helping campuses adequately and efficiently deliver on the safety promises ensured by institutions across the country.

*Forza* provides a tangible reminder that campus security is on the job. These electric vehicles allow campus police to cover a larger beat, more often, while maintaining an approachable interaction between officers and the citizens it serves. Our three- and four-wheel vehicles allow safe passage in areas where

full-size patrol vehicles, or two-wheel alternatives, are unable to traverse. And at \$0.01/mile in energy costs, our vehicles are resource-efficient and eco-friendly; they simply plug in to a standard wall outlet, saving departments significant funding that can be deployed in other critical areas.

In today's society, law enforcement is doing all it can to integrate its officers into the community, transitioning from a "warrior" mentality to a "guardian" mentality. But to do so, officers will require the right resources and tools. VMW's *Forza* Series, with its indoor and outdoor capabilities, offer an ideal solution for crowd management, parking enforcement, special events, tailgate monitoring and patrolling. Customized with personalized logos, sirens and LED lighting, our vehicles provide an approachable and enforceable presence on any campus.

VMW understands and is committed to its customers. As a result, we offer nationwide service, a full line of in-stock parts and a variety of payment plans to meet individualized needs. For more on VMW and its *Forza* series, please visit [www.ForzaScooters.com](http://www.ForzaScooters.com).
